OVER ONE HUNDRED YEARS OF THE ALBANY SEED STORE

1937

TO CUSTOMERS

THE SEEDS I offer for sale are of my own growing and importing, and I take the greatest care in their production to have them pure and true to name, testing everything for germination before selling, making a thorough business of it, and never send out anything that does not grow; this, taken in connection with the system of furnishing the best stock seeds and carefully watching the crops, gives my customers the most ample protection. The seeds offered in this Catalogue are of the very best sorts and strains to be obtained; they comprise all the best standard kinds and many new varieties of merit.

Thanking you for your patronage during the past, I hope for a continuance of the same this season.

How to Order.—In writing your order, do it as plainly as possible, and be sure to sign your name distinctly, giving the post-office address, county and state in full, and also express office, for many times it is better to send by express than by mail. Each year we have orders we cannot fill because they are unsigned. Make your order out as soon as possible. It will be an advantage to you and a favor to us, as later in the season prices are liable to advance.

We Fill Orders Promptly.—We aim to fill orders and dispatch them immediately after receipt, unless some special cause prevents, in which case acknowledgment is made and explanation given. Where no shipping instructions are given, we send by the best route possible. Packages too large to send by mail we shall send either by express or freight. We fill an order for ten cents worth of seed with the same promptness and care as one for fifty dollars.

How to Remit.—Send money by post-office or express money order, registered letter or draft. We guarantee the safe arrival of money sent in this way. Postage stamps received as cash when notes are not obtainable, or to make proper change. (Two-cent stamps preferred.)

We Pay the Postage to all parts of the United States on the seeds mentioned in this Catalogue in packets, ounces and one pounds, without adding anything to the list price.

Please Observe that though we prepay the postage on seeds, as above stated, we make no addition to our Catalogue prices to cover this outlay. When ordering in quantities over one pound add postage at parcel post rates.

Remember the mail and express bring our store to your door. It costs no more to buy of us from a distance than if you came into our store and purchased seed over our counter.

Testing.—All our seeds are thoroughly tested in a most careful manner before we sell them, and only those that grow well do we send out. This, in connection with our system of having to do only with the best stocks, and carefully watching the crops, affords ourselves and customers the best protection possible.

My long experience for the past fifty years in the growing, selecting and improving of stocks enables me to supply customers with seeds that cannot be surpassed.

I do not warrant seed, because, as is well known, so many causes may, and often do, prevent the best seeds from growing and producing crops, from no fault of the seeds. We, therefore, in common with all other reliable seedsmen, wish it distinctly understood that, while we do not send out any seeds that we do not believe to be of the best quality, we sell no seeds with warranty, express or implied, in any respect, and will not be in any way responsible for the crop. If the purchaser does not accept the seeds on these terms they must be returned at once, and the money that has been paid for the same will be refunded.

WE WISH TO CALL YOUR ATTENTION TO THE FOLLOWING VARIETIES OF SPECIAL MERIT FOR THE HOME GARDEN.

PRICE'S IMPROVED GOLDEN WAX BEANS (ROUND POD). A splendid, tender, stringless variety.

PRICE'S ALBANI BEET. Best early turnip shaped for table use.

PRICE'S BUNCHING CARROT. The roots are Orange Red, about five inches long; early and very fine quality.

PRICE'S DANVERS CARROT. Smooth, solid, splendid flavor; best variety for general crop.

PRICE'S FANCY GOLDEN SELF BLEACHING CELERY. Best variety for late Summer or early Fall.

PRICE'S ALBANY MARKET CELERY. An excellent Winter variety.

PRICE'S SPECIAL STRAIN TRUCKERS FAVORITE CABBAGE. Best Winter variety.

PRICE'S EARLY DAYBREAK CORN. The earliest and largest of all white cob corns.

PRICE'S GOLDEN EARLY MARKET CORN. Very fine quality, early and prolific.

PRICE'S BUTTERCUP SWEET CORN. As early as Golden Bantam; larger ears; very sweet; a beautiful golden color.

PRICE'S GOLDEN EVERGREEN CORN. A general crop golden variety, large ears, deep kernels; a splendid table variety.

GOLDEN CROSS BANTAM. Wilt-Resistant Hybrid. Produces marked increase in yield and surprisingly uniform stalks and ears.

GOLDEN COUNTRY GENTLEMAN. This new variety is identical in stalk and ear characteristics with regular Country Gentleman, except for its golden color.

PRICE'S HYBRID CUCUMBER. Very uniform, good green color, and very prolific. A splendid pickling variety.

STRAIGHT 8 CUCUMBER. A new variety excellent for the kitchen garden, fruits dark green 1½ inches in diameter, well rounded at the ends.

PRICE'S SILESIA LETTUCE. Very curled and tender; fine for early and general crop; one of the best for market and family use.

PRICE'S WHITE BIG BOSTON LETTUCE. An early solid heading variety, crisp and tender.

THE BAKER MUSK MELON. Salmon fleshed; hard shell; a delicious table melon.

THE BENDER MELON. Salmon color; deep fleshed; hard shell; an excellent shipper.

PRICE'S IMPROVED YELLOW GLOBE DANVERS ONION. An excellent keeper; heavy yielder; uniform in shape and color.

PRICE'S IMPROVED TELEPHONE PEAS. A very fine variety for general crop; large dark green pods; very prolific.

PRICE'S GIANT SWEET PEPPER. Very sweet; large and uniform fruits; ripens quite early; bright scarlet color and very prolific.

PRICE'S IDEAL HOLLOW CROWN PARSNIP. Smooth, sweet and large; a very fine garden variety.

PRICE'S FORCER RADISH. A very quick grower, short top, flesh crisp and mild flavor.

PRICE'S EARLY SUPERB TOMATO. As early as Bonny Best; larger, more solid; very uniform and ripens evenly.

SCARLET DAWN TOMATO. Fruits medium large with thick wall. Globular and smooth. Bright scarlet, highly desirable for home garden.

SPECIALTIES IN FLOWER SEEDS

PRICE'S GIANT FLOWERED MIXTURE OF BRANCHING ASTERS. Flowers are most beautifully formed, large and double, in a variety of bright colors.

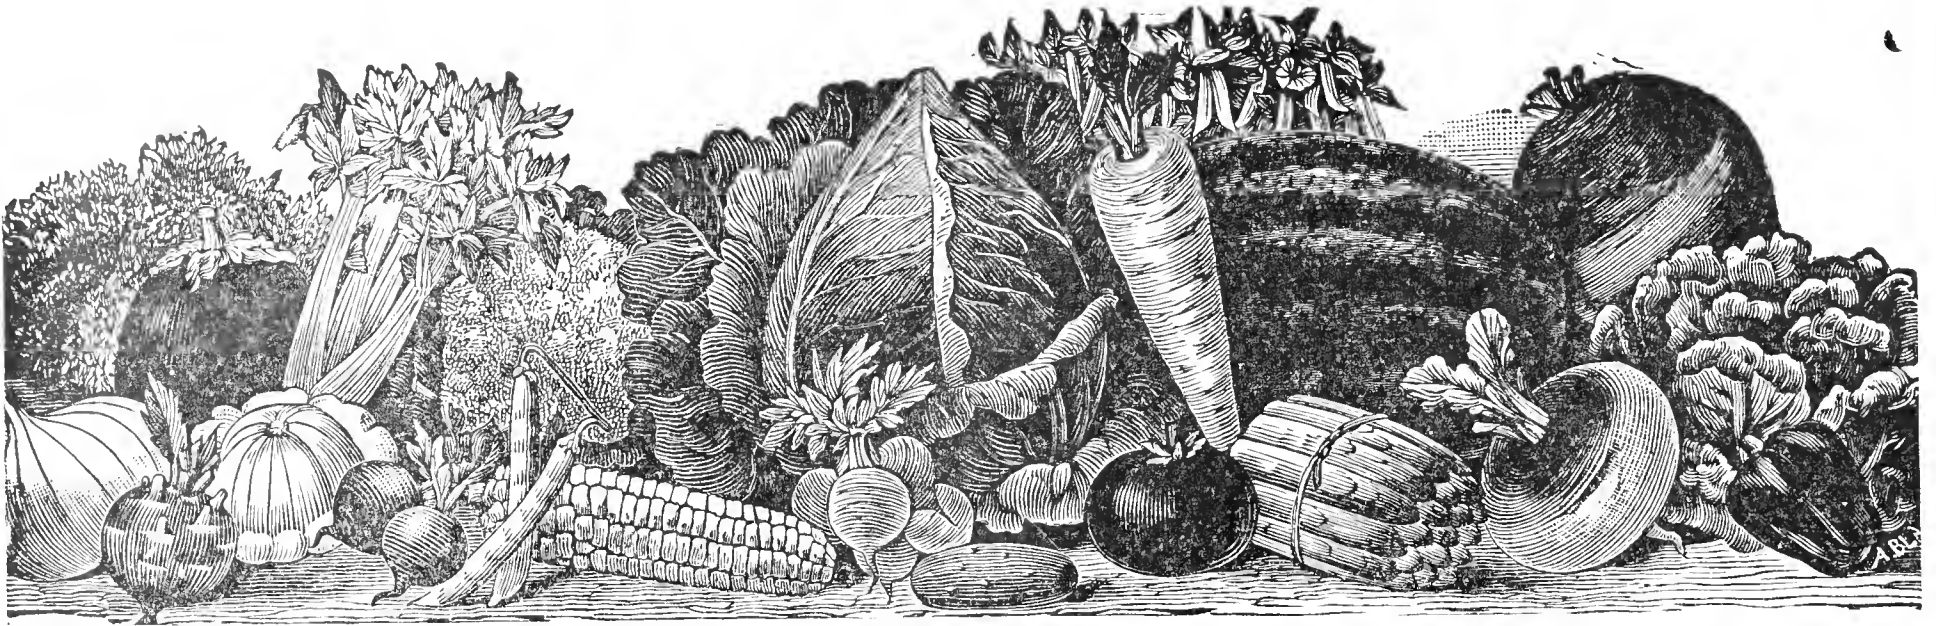

PRICE'S SPECIAL MIXTURE OF DWARF NASTURTIUMS. A fine mixture of large flowering varieties in many colors.

PRICE'S SUPERB MIXED PANSY. Large flowers, fine colors with brilliant markings.

PRICE'S SUPERB MIXTURE OF SWEET PEAS. An unsurpassable mixture of bright colors in exquisite shades, large flowering type.

PRICE'S GIANT FLOWERED ZINNIAS. Large double flowers of perfect shape; brilliant colors of compact growth.

PRICE'S SPECIAL MIXTURE OF WILD GARDEN FLOWER SEED. An interesting variety of flowers in brilliant colors.

VEGETABLE SEEDS

ASPARAGUS

Sow the seed in the Spring as early as the ground will permit, in rows one foot apart. Cultivate and keep free from weeds. When two years old transplant to the permanent beds. Roots should be set fourteen to sixteen inches apart in the row and a distance of two and one-half or three feet between the rows. Set fourteen or sixteen inches deep and cover gradually.

ASPARAGUS ROOTS (Two Years Old)

Palmetto, Mammoth Washington, Mary Washington, and Martha Washington by the 100 or 1000. (Price on application.)

---	--

CARROT

PRICE'S BUNCHING. New. This new carrot is a particularly fine bunching carrot. The roots grow about 8 inches long, are smooth, slightly stump rooted and of excellent quality, being sweet and fine grained, deep orange in color and with practically no core.

This carrot is an excellent kind for the home garden as well as a very attractive variety for market and roadside stands. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$1.65.

TENDERSWEET. The Sweetest Kind. This new carrot has become a very popular variety. The fine textured deep orange flesh is sweeter than any we have tasted. The outside color is an unusually deep orange tinged with red at the top.

Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.50.

RED CORED CHANTENAY. The new "coreless" strain of Chantenay which is being so widely grown because of its very fine quality and attractive appearance.

Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.35.

PERFECTION. A new larger and better Coreless Carrot. This excellent carrot is becoming increasingly popular for fall crops, both for home use and market. The carrots resemble Amsterdam Forcing in shape, but are nearly two inches longer, and are very smooth and symmetrical. There is no "core" as the deep orange color extends right through to the center. The quality of Perfection is very fine. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$1.95.

IMPERATOR. This is the fine quality bunching carrot that comes into our markets from California. The roots average about 8 inches long, are somewhat tapering, of deep orange color which extends right to the center, and with a very small core. The tops are just right for bunching. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$1.65.

NANTES, CORELESS. This is one of the best of the "coreless" varieties and is particularly valuable for the home garden and as a bunching kind for market. The roots are 7 to 8 inches long, the same size the whole length, smooth and stump-rooted making it very attractive when bunched. The color is deep orange which extends through the whole root without a light colored "core." A very fine variety for roadside sales.

Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.50.

CHANTENAY. (Special Strain.) This is the most popular carrot for general use and market. The roots grow 6 to 7 inches long, tapering only slightly and are quite stump-rooted. The color is deep orange and the roots are fine grained, smooth as a bottle and of fine quality. We offer a very uniform strain of this variety which grows **an inch longer** than the usual Chantenay. Growers find this to be a fine bunching carrot.

Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25.

DANVERS HALF LONG. The roots taper a little more at the bottom than the old strain of Chantenay and grow about 1 inch longer, being 7 to 8 inches in length. This variety is valuable for stock feeding as well as for market. Very heavy yields are often obtained, a thousand bushels per acre being not at all unusual. Our stock is the most uniform obtainable.

Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25.

COLLARDS

GEORGIA. Has large cabbage like leaves, which grow loosely on stems 2 $\frac{1}{2}$ to 3 ft. tall. It does not form heads but the leaves are used. It is popular in the South for table use and stock feeding.

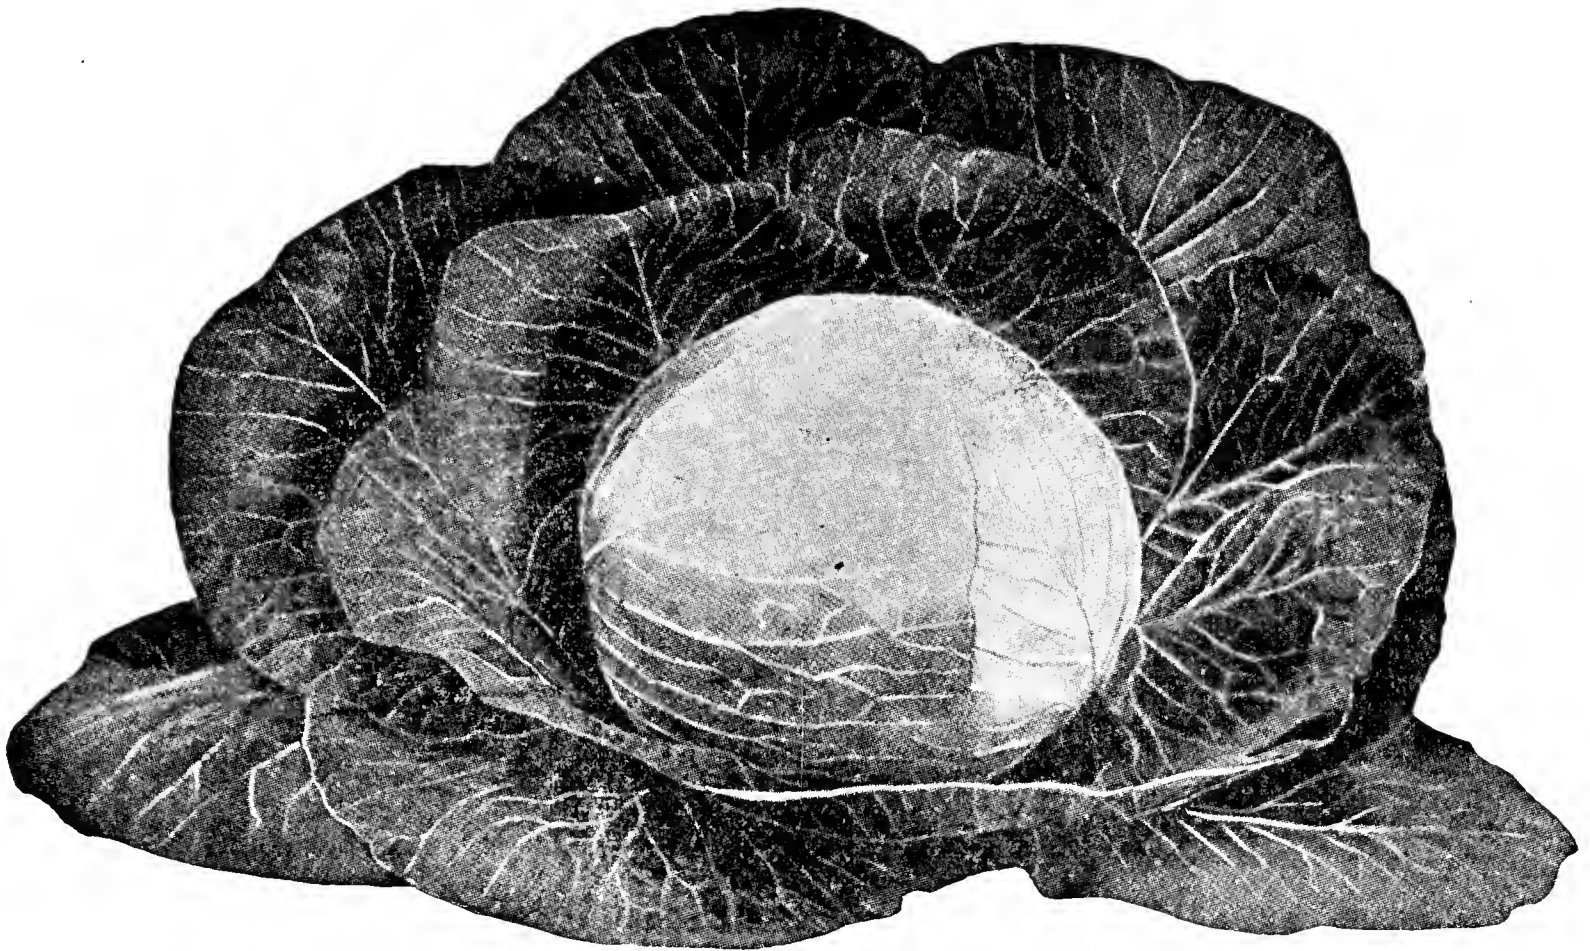

Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 25c; lb. 85c.

CAULIFLOWER

Seed can be sown under glass for early and outdoors for general crop, and transplanted the same as Cabbage.

PRICE'S PEDIGREE SNOWBALL. The earliest of all Snowball, the most dwarf, of compact growth and a very sure header. Will stand dry weather better than any other variety of Snowball Cauliflower.

PRICE'S PEDIGREE SNOWBALL	per pkt. 25c; $\frac{1}{4}$ oz. \$1.25; $\frac{1}{2}$ oz. \$2.00; oz. \$3.50

BROCCOLI

The Italian Sprouting or branching type is being used increasingly, and is a valuable addition to the list of vegetables that can be readily produced in most sections of the country.

ITALIAN GREEN SPROUTING (Calabrese)

The leading variety for shippers, also used largely by market gardeners and in home gardens. A tall branching plant forms a central head of bluish green flower buds resembling a loose head of Cauliflower. After the main head is removed, side branches continue to develop throughout the season, and frequently form small heads, which, with the stems, are cut and served in the same way as Asparagus. It is a highly desirable, delicious vegetable, steadily gaining in favor. Per pkt. 10c; $\frac{1}{4}$ oz. 20c; $\frac{1}{2}$ oz. 35c; oz. 60c; $\frac{1}{4}$ lb. \$1.25.

CELERY

CULTURE

Should be sown in the Spring in the open ground or in the hot bed. When four or five inches high set in straight rows about five inches apart. The rows should be three or three and one-half feet apart. Water and protect until well rooted. When large enough to blanch, close the stalks and draw the soil up, using care not to get the soil in the center of the heart or stalks.

BEST EARLY OR SUMMER VARIETIES

PRICE'S GOLDEN SELF BLANCHING (French), pkt. 10c; $\frac{1}{2}$ oz. 45c; oz. 80c; $\frac{1}{4}$ lb. \$2.75; $\frac{1}{2}$ lb. \$5.25; lb. \$10.00.

GOLDEN SELF BLANCHING (American), (tall), pkt. 15c; $\frac{1}{2}$ oz. 45c; oz. 80c; $\frac{1}{4}$ lb. \$2.50; $\frac{1}{2}$ lb. \$4.50; lb. \$9.00

EASY BLANCHING (fancy), pkt. 10c $\frac{1}{2}$ oz. 80c; oz. \$1.25; $\frac{1}{4}$ lb. \$4.50; $\frac{1}{2}$ lb. \$8.00; lb. \$16.00.

PRICE'S BONNIE GREEN (new easy Blanch Type, very solid), pkt. 15c; $\frac{1}{2}$ oz. 80c; oz. \$1.40; $\frac{1}{4}$ lb. \$5.00; $\frac{1}{2}$ lb. \$9.50; lb. \$18.00.

GOLDEN PLUME. Is becoming very popular among the large market gardeners. It is Easy Blanching crossed with Golden Self Blanching a new Golden type of Easy Blanching, less subject to rust and blight, and a stronger and better keeper. Pkt. 25c; $\frac{1}{2}$ oz. 85c; oz. \$1.50; $\frac{1}{4}$ lb. \$4.50; $\frac{1}{2}$ lb. \$8.00; lb. \$16.00.

BEST LATE FALL AND WINTER VARIETIES

PRICE'S ALBANY MARKET, pkt. 25c; $\frac{1}{2}$ oz. 70c; oz. \$1.25; $\frac{1}{4}$ lb. \$2.50; $\frac{1}{2}$ lb. \$4.50; lb. \$8.50.

PRICE'S WINTER KING. A new variety, plants medium height, thick heavy ribs, can be marketed in November or held until quite late in the winter. Pkt. 10c; $\frac{1}{2}$ oz. 30c; oz. 50c; $\frac{1}{4}$ lb. \$1.60; lb. \$6.00.

COLUMBIA, pkt. 10c; $\frac{1}{2}$ oz. 35c; oz. 60c; $\frac{1}{4}$ lb. \$1.75; $\frac{1}{2}$ lb. \$3.25; lb. \$6.00.

CELERIC (KNOB CELERY)

GIANT SMOOTH ROOTED, pkt. 10c; $\frac{1}{2}$ oz. 25c; oz. 40c; $\frac{1}{4}$ lb. \$1.25; $\frac{1}{2}$ lb. \$2.25; lb. \$4.00.

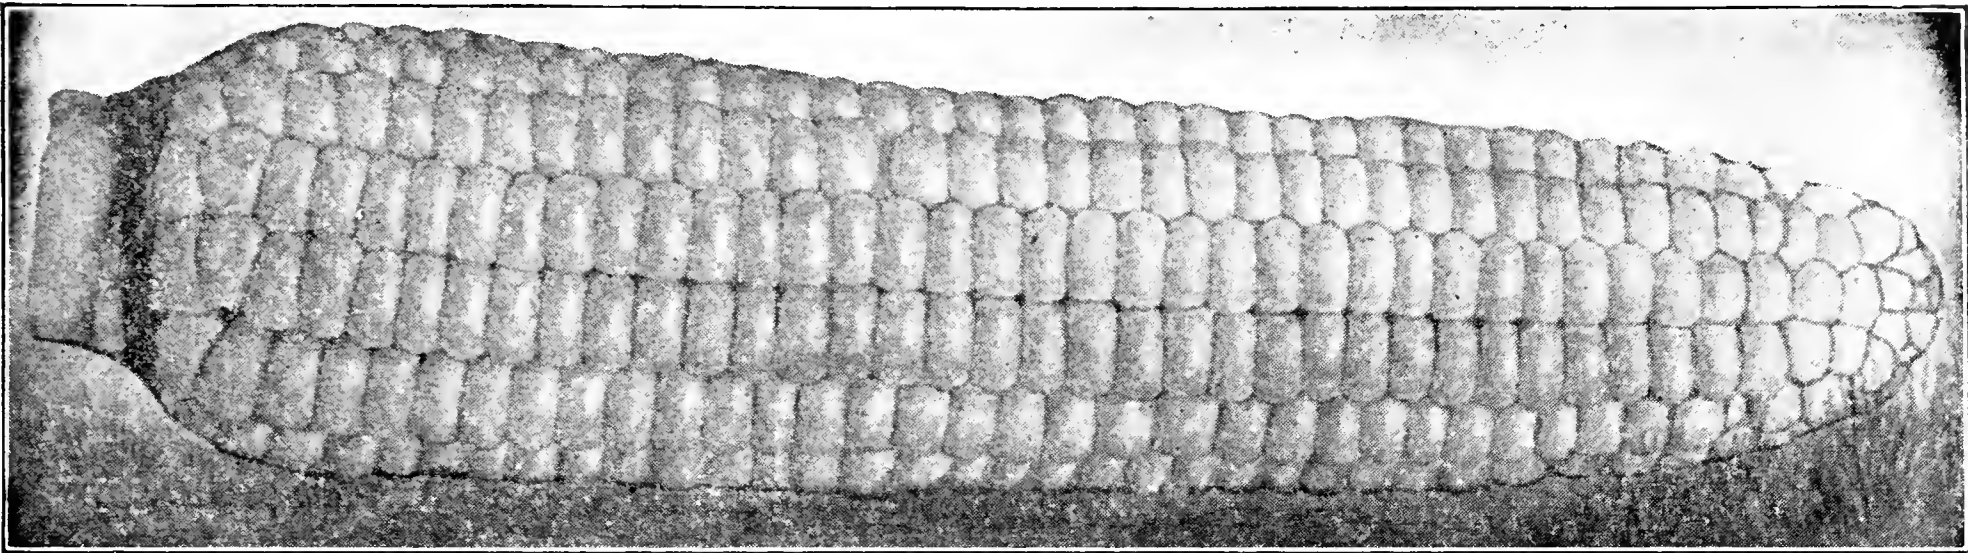

CELERY PLANTS

(See Vegetable Plants, page 22)

Parties growing celery plants for their own use, unless in very large quantities, will generally find it more satisfactory to buy the plants. We can supply small or large quantities of plants from June 15th to August 1st, and will be pleased to quote price on application. Plants can be carefully packed in wet moss and shipped long distances and will arrive in good condition.

THYME	per pkt.	10c; ½ oz.	20c; oz.	35c; ¼ lb.	1.25

DIRECTIONS FOR MAKING A NEW LAWN

The ground should be spaded or plowed to a depth of ten or twelve inches, if well rotted stable manure can be obtained it should be spaded or plowed in.

After plowing, the soil should be thoroughly pulverized and Sheep Manure, Ground Bone or a High Grade Fertilizer well raked in.

The land should be raked as level as possible and all indentations removed.

Care should be taken to sow the seed just as evenly as possible, the quantity of seed that is to be used should be divided into two equal parts and should be sowed lengthways and crossways to assure a thorough covering of the ground, then apply a very light dressing of finely sifted good soil, roll or plank the ground quite firm, this will press the seed into the soil and prevent the drying out from the top.

A good Lawn Grass Mixture should be used and should be sowed quite generously.

If top soil is to be used the land should be plowed or spaded and pulverized, four or five inches of good soil applied evenly and rolled down firmly, then thoroughly raked with steel rake and follow above directions for seeding.

RENEWING AN OLD LAWN

A good liberal dressing of Sheep Manure, Ground Bone or High Grade Fertilizer should be applied, and the lawn should be thoroughly raked two or three times lengthways and crossways with a steel rake, this will remove all dead matter and loosen the surface of the lawn so the seed that is being applied can lodge in the freshly loosened soil and germinate.

After sowing seed give it a light dressing of finely sifted good soil, then roll or plank firmly.

This should be done when the lawn is thoroughly dry.

FERTILIZING OR FEEDING A LAWN

A lawn should be fertilized (Plant food supplied) two or three times during the growing season, early Spring, Summer and Fall.

Sheep Manure is a natural Grass Manure and will give the lawn a quick start, is lasting and will produce a rich green color.

Ground Bone is a slow steady strong feed and is excellent where the soil is poor.

LIMING A LAWN

When your lawn begins to show Chick Weed or patches of Green Moss it is getting sour.

Give it a dressing of very fine ground Lime Rock (agricultural Lime). There should be a week or ten days between the Liming and Fertilizing a lawn.

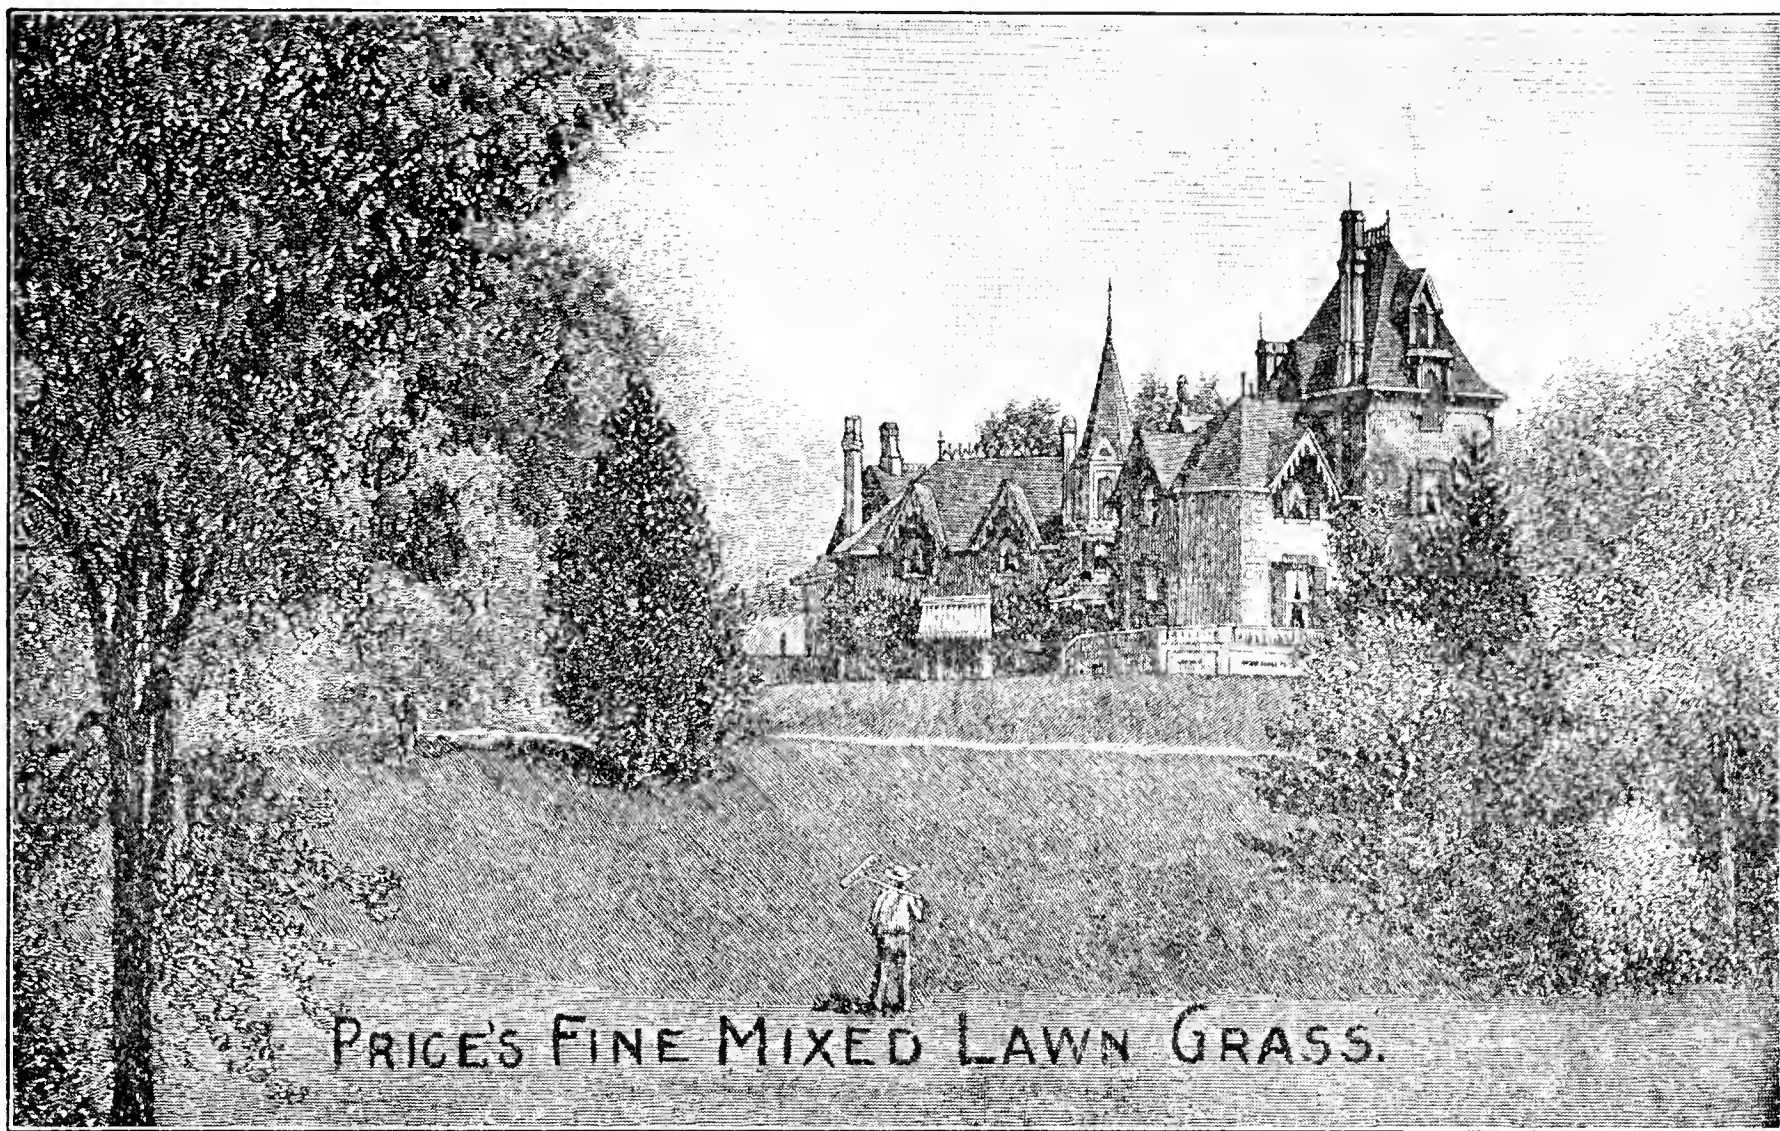

Seed your lawn several times during the growing season. By doing this you will keep the lawn quite free from weeds.

Just as soon as the grass on a lawn begins to get poor and thin, the many weed seeds which are in the fields and vacant places will be carried by the winds or stirred up by passing vehicles and will find a resting place in your lawn, will grow, thrive and will crowd out the finer grasses. This can be overcome by keeping the lawn well seeded, leaving no lodging places for the weed seeds.

A lawn should be rolled several times during the season, this tends to firm down the sward and prevents the sod from becoming porous which sometimes is the cause of a lawn turning brown or having a yellowish unhealthy appearance.

A lawn should be mowed at regular intervals with a good sharp lawn mower. It is a good idea to have the clippings not over one inch or one and one-half inches in length. If these are not raked off they will sink down between the blades of grass and soon disappear, will form a mulch and hold the moisture. They will decay, furnish plant food for the lawn and prevent weed seeds from lodging.

In a wet season a lawn can be mowed quite frequently. When the season is hot and dry, caution should be used, because if it is cut too close the sun will have access to the grass roots, will dry and parch the ground and cause the lawn to turn brown.

PRICE'S FINE MIXED LAWN GRASS

Is composed of a mixture of the best varieties of fine swarding grasses, and White Clover, especially adapted for seeding lawns, door-yards, cemetery lots, etc.

The best and purest grade of Seeds that can be obtained are used in this mixture.

One pound will sow 15 by 20 feet or 300 square feet.

Lb. 40c, 2 lbs. 75c, 5 lbs. \$1.75, 10 lbs. \$3.25, 20 lbs. (Bushel) \$6.50.

PRICE'S CAPITOL PARK LAWN SEED

This is a very good mixture but contains fewer number of swarding grasses.

Lb. 30c, 2 lbs. 50c, 5 lbs. \$1.25, 10 lbs. \$2.50, 20 lbs. (Bushel) \$5.00.

PRICE'S MIXTURE OF GRASSES FOR SHADY PLACES

This mixture is composed of grasses that are adapted to shady places.

Lb. 50c, 2 lbs. 90c, 5 lbs. \$2.00, 10 lbs. \$3.50, 20 lbs. (Bushel) \$7.00.

IT IS ADVISABLE TO SOW EXTRA HEAVY IN SHADY PLACES.

WHITE DUTCH OR LAWN CLOVER

$\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 35c, 1 lb. 60c, 5 lbs. \$2.75.

GLADIOLUS

- BETTY NUTHALL.** A warm, light coral with pale orange throat and a light feathering of carmine. The flowers are often 6 inches across, of splendid substance, and are well placed on tall, strong spikes.

DR. F. E. BENNETT. Deep peach-red, with flame-scarlet suffusion, lip speckled ruby and white. Large flowers borne on tall, stiff stems. The general effect of the flower is red and it is considered the finest of its color.

GOLDEN MEASURE. A deeper shade of yellow, heretofore unknown in the large-flowering Gladiolus. Several of these gorgeous flowers in bloom at once on a tall stem give a most magnificent effect.

MR. W. H. PHIPPS. Superabundance of bloom and remarkable color have combined to bring this variety rapidly to the fore. The huge flowers, perfectly placed on a tall stem, are clear La-France-pink, overlaid with glowing salmon-rose, frequently speckled with ruby.

MRS. LEON DOUGLAS. Enormously large flowers of beautiful begonia-rose, striped with flame-scarlet, the lower petals pale lemon, speckled ruby. The tall, strong stems produce several side-shoots. Considered one of the largest Gladiolus in existence.
- PEACE.** Few varieties have become as popular as Peace. The general effect of the flower is white, with a pale lilac feathering on the interior petals. Large, well placed and borne on tall, strong spikes.

REV. EWBANK. A beautiful light porcelain-blue, giving the effect of an almost solid color; deep blue blotch on lower petals; early and good-sized flowers.

MRS. FRANK PENDLETON. Salmon-pink which extends to reverse side of the petals as well as in the center, with a rich, deep maroon blotch on the three lower petals.

MRS. DR. NORTON. Delicate cream and pink, deepening toward the edges; sulphur-yellow center. Flowers widely expanded.

E. J. SHAYLOR. Tall, very strong plants and large blooms of a beautiful deep rose-pink. This variety has recently been awarded a certificate of merit in London.

PURPLE GLORY. Deepest velvety maroon with almost black blotches. Large, ruffled flowers on very tall, sturdy stems. A real giant in all respects.

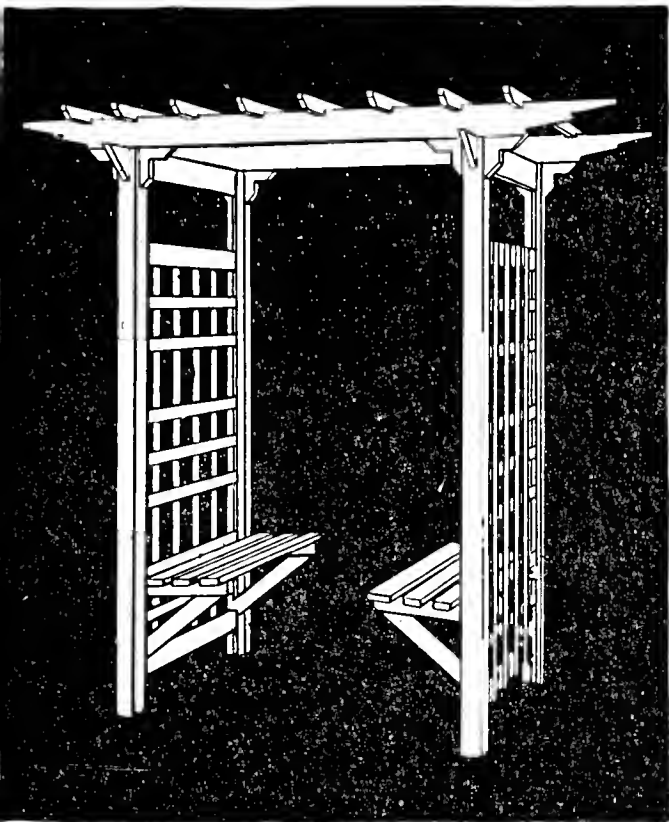

HALLEY. Largely grown on account of its earliness. The flowers are beautiful salmon-pink, with creamy white blotch in throat. One of the earliest-blooming.

We carry many other varieties not listed above.

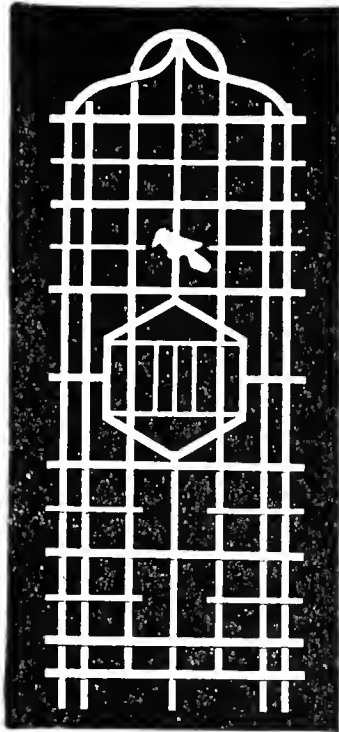

POT LABELS, GARDEN LABELS, GARDEN REELS, AND GARDEN LINE.			
ROUND PAINTED PLANT STICKS in lengths from one and one-half feet to six feet.			
WOODEN PLANT TUBS, made of cedar, painted green, with iron hoops and drop handles.

FERTILIZERS

Pulverized Sheep Manure

Nothing can equal this for LAWNS, PLANTS, and Gardens, as it is the strongest of all natural manures, chemical analysis showing it to contain a higher per cent. of fertilizing ingredients—ammonia, phosphoric acid and potash—than in any animal fertilizer in use. It is sterilized to kill all foul seeds and ground fine. It is clean, easily and quickly applied, has no unpleasant odor, will not kill or burn the grass like the commercial fertilizers, will not sow a crop of noxious weeds for you like Barnyard or Stable manure to fill your lawns. It is immediate in its effect and lasting.

A beautiful Lawn is a great attraction to a home and as the constant growing and cutting of grass will exhaust the soil it makes it necessary to enrich it in order to keep your lawn in a state of perfection. To do this some use Barn Manure, which is bulky, unsightly and introduces seeds of obnoxious weeds and grasses.

A few dollars spent in Sheep Manure will not only give you a beautiful lawn, but will preserve it and be a saving of money in the long run, as it is of full strength, and is very easily handled. This makes it the most economical food for lawns and plants that it is possible to obtain.

FOR GARDENS, dig into the soil when sowing the seed or setting out plants and it will promote a rapid strong growth of flowers or vegetables.

FOR YOUNG TREES or BUSHES, it makes the finest mulch, after watering it becomes a very strong solution, soaking the roots thoroughly with a needed food and they will show the good effects in a very few days after using.

FOR PLANTS and FLOWERS, it is the most nutritious food that can be applied, as a liquid dressing using five pounds to five gallons of water and may be used with perfect safety, or sprinkle it dry around the plants, working it into the ground. Remember, it will not injure the most sensitive plant but will produce healthy plants, with rich blossoms.

DIRECTIONS. Sprinkle thickly over the grass early in the Spring and once or twice in the Summer or any time during the growing season, using about 100 lbs. to 2,000 square feet, or to a space of 50 feet one way by 45 feet the other; 50 lbs. will cover 25 by 23 feet. If the season is dry, wet it down or sow just before rain. If you have only a small place it is well to buy a bag, as you can use it on your grass and gardens early and through the season as it keeps in good condition and is convenient to have on hand. Put up in 100 lbs., 50 lbs. and 25 lb. bags; 10 lbs., 5 lb. and 1 lb. packages. Prices of the above on application.

NITRATE OF SODA. Is valuable solely for the Nitrogen it contains, and is used chiefly as a stimulant to force slow-growing grass or backward crops. It is quick in its action, forcing the plants along to maturity, and can be used alone or mixed with some sort of fertilizer.

**ACID PHOSPHATE
MURIATE OF POTASH
PHOSPO PLASTER**

PRICES OF THE ABOVE ON APPLICATION.

GROUND BONE. For Trees, Grapevines, Currant Bushes, or any thing that has heavy permanent root growth, as it is slow in effect.

HIGH GRADE FERTILIZERS. For Garden and Field Crops put up in 100 lb., 50 lb., 25 lb. bags, and in 10 lb. and 5 lb. packages.

PEAT MOSS.
(Torf Mull)

Put up in bales approximate weight 165 lbs. to 180 lbs.

DISINFECTANTS AND INSECTICIDES FOR SPRAY AND DUSTING

HAMMOND'S SLUG SHOT.

HAMMOND'S GRAPE DUST.

HAMMOND'S KEROSENE EMULSION.

**DRY BORDEAUX AND PARIS GREEN
COMPOUND.**

POWDERED SULPHUR.

BOWKER'S PYROX.

ARSENATE OF LEAD.

PURE PARIS GREEN.

HELLEBORE.

SCALECIDE.

LIME AND SULPHUR.

DRY BORDEAUX MIXTURE.—Prevents blight on all crops.

STANLEY'S CROW REPELLENT.

BLACK LEAF 40. Sulphate of Nicotine. —It is highly recommended for Pear Thrip, Pear Psylla, Hop Louse, Aphis, etc. Also for Sheep and Cattle Dipping. Directions on package.

"NICO-FUME" PRESSURE-FUMIGATOR.—For years, florists have used "Nico-Fume" Powder by burning it in loose piles on the greenhouse walk. But some nicotine will condense on the walk and thus be lost. To prevent this "Nico-Fume" Powder is now supplied in our special pressure-fumigation tins, in which the Powder is burned under pressure, producing finely-divided fumes, that quickly kill the insects. Results: Greater economy and increased efficiency.

NICO FUME LIQUID.—A very effective vaporizing liquid for spraying plants and fumigating greenhouses.

EVER GREEN.—Non-Poisonous Insecticide.

FISH OR WHALE OIL SOAP.—For the destruction of insects on plants.

NO. 9 CELERY DUST.

BUG DEATH.—Can be applied wet or dry.

TOBACCO DUST.

RED ARROW SPRAY.

ANTROL.—For destroying Ants on lawns and in vegetable crops.

SNAROL.—An effective bait for Slugs, Cutworms, Snails, Grasshoppers and other Garden Pests. A ready prepared meal for broadcasting on the ground under the plants; does not deteriorate from rain or sprinkling.

ROTONONE DUST.

NICOTINE DUST.

DISINFECTANTS

CARBOLA.—Use it instead of White Wash and Disinfectants.

CARBOLINEUM.—A splendid disinfectant and wood preservative.

PRATT'S DIP AND DISINFECTANT.

SEMESAN.—For Seed, Plant and Soil Diseases.

SUNDRIES

HAMMOND'S WEED KILLER.—Will remove the weeds from Tennis Courts, Driveways, and Garden Paths.

DOLGE WEED KILLER.—Non-Poisonous.

PERMANITE.—The Modern Material for Greenhouse and Sash Glazing. Safe, Quick and Lasting.

HOT BED MATS.

THERMOMETERS, hotbed greenhouse, dairy and incubator.

PRUNING TOOLS.

GRAFTING TOOLS.

GRAFTING WAX.

LAWN MOWERS.

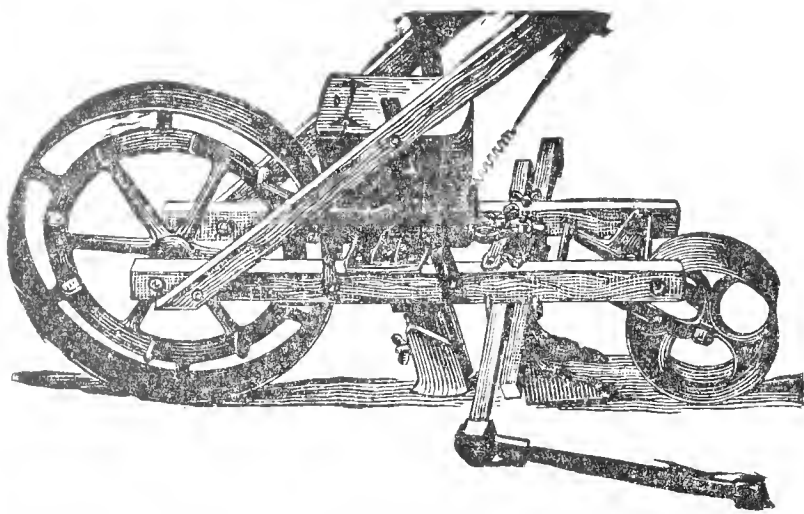

POULTRY SUPPLIES.

DOG FOODS.

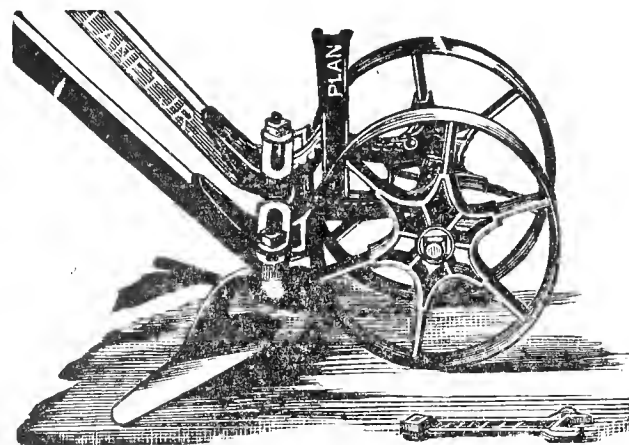

DOG FURNISHINGS.

DOG REMEDIES.

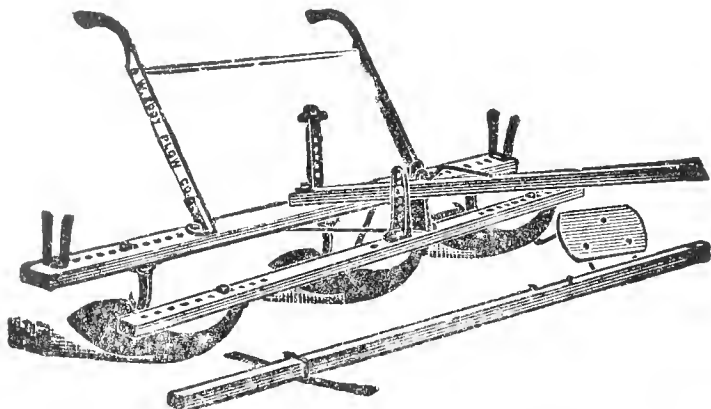

BIRD KEEPER SUPPLIES.

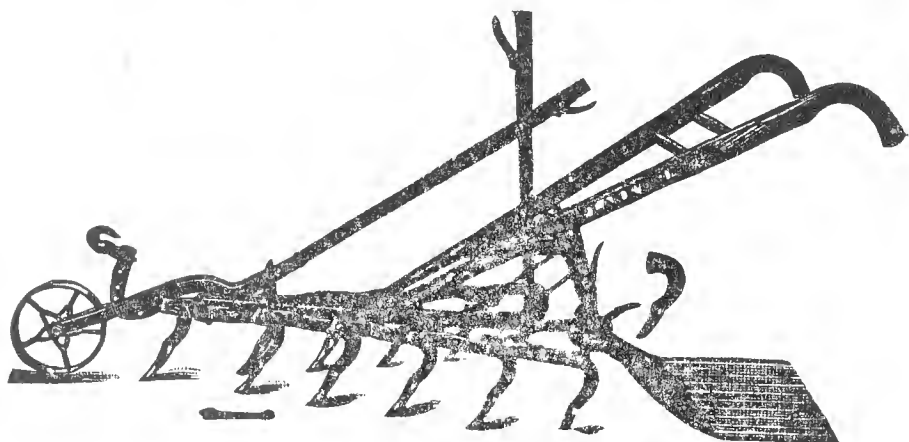

New Model Seed Drill. Will sow anything from Celery Seed to Peas and Beans perfectly.

IRON AGE GARDEN AND FARM TOOLS

SYRACUSE COMBINATION PLOWS AND PLOW CASTINGS.

Steel Mouldboard and Landside, Chilled and Steel Shares.

These Plows have a large and unprecedented sale, and are extremely popular in all sections where Combination Plows are used. The Mouldboard, of highest grade soft centre plow steel, is so fashioned that a furrow may be turned smoothly up or down on sloping land, which feature has greatly increased its sale in all sections where the land is somewhat rolling. We commend this Series to all parties desiring a perfect combination Plow for general purpose work.

SYRACUSE DOUBLE AND SINGLE SULKY PLOWS.
